

## Our Environmental Policy

Eco-PV wants to contribute to the growth of community's welfare through a balanced management of environment to guarantee sustainable development to protect the future generations. The Environmental Policy of our organization is based on a coherent set of principles:

Compliance with environmental laws

Guarantee respect of environmental regulations through access, identification, evaluation and surveillance of each new measure.

Continuous improvement of environmental performance

Improve over the years the results of environmental management and activities in compliance with the Environmental Policy.

Environmental prevention

Prevent, eliminate and reduce pollution and the use of natural resources, using the best available technologies.

Environmental culture and professional growth

Develop a sense of responsibility towards the environment through appropriate knowledge of the environmental aspects with information and training initiatives. To this targets, our Management is committed to ensuring that the Environmental Policy is understood, implemented and supported by all collaborators.

Diffusion on environmental principles

Disseminate knowledge within and outside the company -with particular regard for our suppliers- of the principles of the Environmental Policy and the results achieved. Our logic is of transparency and dialogue one, encouraging everyone to not pollute.

Collaboration with stakeholders

Collaborate with all stakeholders in compliance with government policies to encourage dialogue, transparency and partnership and to provide a contribution commensurate with own role and prerogatives.

Management of environmental effects

- Monitor and reduce atmospheric emissions from fixed and mobile sources present in the company's daily operations;

- control the production and disposal of solid and liquid waste trying to reduce their quantities and danger;
- analyze and optimize energy and water consumption;
- promote among its costumers a correct environmental behavior.

### Management System

Monitor and improve the environmental impacts of our activities with the adoption of an Environmental Management System.

### New projects

Ensure the preventive assessment of environmental aspects in all activities by adopting, if it's possible, solutions with a lower environmental impact.

The Management undertakes to disseminate, implement and review this Environmental Policy follow environmental changes and socio-economics evolution.
